Advanced Biotech Awarded Bronze by EcoVadis

Advanced Biotech is proud to announce that we have received a Bronze Medal from EcoVadis, a globally recognized authority on corporate sustainability. This recognition, earned with a score of **59/100**, highlights our commitment to environmental stewardship, ethical practices, and sustainable growth, placing us in the top **35%** of assessed businesses and above the industry average.

Since beginning our sustainability journey in 2022, we have worked diligently to align our operations with best practices in key areas assessed by EcoVadis: Environment, Labor & Human Rights, Sustainable Procurement, and Ethics. This award validates our progress and serves as a strong foundation for continued improvement as we strive to achieve even greater milestones.

This achievement is a testament to the dedication of our team, whose hard work has been instrumental in advancing our sustainability goals. While we celebrate this milestone, we are already focused on the future, with the ambition to achieve a Silver Medal or higher in the coming years.

Thank you to our team and partners for supporting our journey as we continue to drive innovation, responsibility, and excellence in everything we do. Together, we are shaping a more sustainable future.
